

# Lift and Engineering Services Limited

## ENVIRONMENTAL POLICY STATEMENT

Lift & Engineering Services Ltd, is committed to protecting human health and the environment. This commitment is a keystone to all that we do. When waste generation is unavoidable we are committed to reducing its environmental impacts on land, water, air, and human health through beneficial recycling. To enhance our efforts, we will utilize lower toxicity raw materials and lower energy processes whenever possible. The following principles are applicable to company operations nationwide.

Comply with all relevant legislation in order to promote a quality environment for the future.

- Protection – We will conduct all operations in a manner that protects the environment and our employees, neighbours and customers. We will proactively work to implement procedures and programs to prevent pollution.
- Compliance – We will comply with all legal requirements and will proactively implement programs and procedures to ensure compliance.
- Conservation – We will practice and promote the conservation of nature and the earth's energy resources.
- Communication – All employees are responsible for helping the company identify and remedy any possible violations.

We will, by continually monitoring our operations develop programs to continuously improve the environmental performance of Lift & Engineering Services Ltd. Environmental goals and objectives will be established, reviewed and approved by Directors and Senior Managers.

Lift & Engineering Services Ltd is committed to conducting business in a manner which respects, preserves and improves the environment. To do this we:

- Conduct our services in an environmentally responsible manner.
- Use energy wisely and, when possible, improve the energy efficiency of our operations.
- Comply with all Environmental regulations. And professional standards of good industry practices.
- Use technologies and operating procedures designed to minimize health and safety risks.
- Encourage employees to report any condition **that may pose an environmental, health or safety hazard.**

**DAVID HAYWOOD - MANAGING DIRECTOR**
